ABSTRACT

The national education development is carried out by consideration the international agreements such as the Education for All, Millennium Development Goals and World Summit on Sustainable Development clearly emphasizes the importance of education as one way to overcome poverty, improve fairness, comprehend cultural values and multiculturalism, enhance social justice, as well as providing the latest educational materials and equipment, either in the form of printed materials or technology-based materials. Due to the rapid technology development at this moment, the Information Technology (IT) becomes an integral part in education, including Naval Development and Education Command (Kobangdikal). Therefore Kobangdikal requires an IT strategic plan that will serve as the basis for the development of IT in Kobangdikal. The IT Strategic Planning aims to find out information technology in accordance with the requirements and main tasks of Kobangdikal thus can integrate all the elements in its ranks, giving an overview and recommendations on the needs of the application required by Kobangdikal, and recommend strategic steps according with the concept Kobangdikal tasks in the future.

The Methodology in the IT Strategic Planning in Kobangdikal is divided into five stages, beginning with the first preliminary stage, then collect data and information, analysis current conditions, analysis expected condition, ending with the IT strategic planning formulation. From this formulation will be generated internet network planning, web development planning, e-learning planning, and enterprise applications planning for Kobangdikal Directorate. This research is expected to provide benefits to the leaders in composing IT strategic planning aligned with Kobangdikal strategic planning, provide a clear reference to the leaders for the development of IT operational tasks in accordance with the requirements of Kobangdikal and follow the direction of future development tasks.
