Badan Penanaman Modal (BPM) in charge of carrying out all activities in the field of business and investment areas in accordance with the policy outlined by the provisions of the legislation in force and rules for implementation. BPM closely related to the P2T UPT (Unit Pelaksana Teknis Pelayanan Perizinan Terpadu), one of the sub-areas that are under the Investment Board of East Java Province. So as to improve the performance and the relationship between them, BPM plans to expand its services with planning a new building located behind the building UPT P2T.

The site is in Jl. Pahlawan 116 Surabaya, hidden and flanked by buildings on all four sides, so that the building setback need to be considered for the aspects of security, safety, and comfort. Complex condition of existing building area is in the area of cultural heritage, then the concept which was applied to design of this building is infill. The existence of the new building should create a compatible environment, harmony and may support the functions of the existing building.
