ABSTRACT

Government must provide services and facilities, and ensure the implementation of quality education for every citizen without discrimination, and the public is obliged to provide support of resources in providing education. “Bidik Misi” Scholarship is a scholarship and education expenses given to students or future students from families who are economically disadvantaged and have the achievements, both in academic / curricular, co-curricular and extracurricular. One of the ways to measure the success of the “Bidik Misi” Scholarship program can be seen from the GPA of students that have received “Bidik Misi” scholarships. Therefore there is need for research to find out what factors are affecting the GPA of students who receive “Bidik Misi” scholarships. Goal of this study is to describe the characteristics and determine the factors that affect the GPA of diploma students who receive “Bidik Misi” scholarships in Surabaya. The method that used to analyze the factors that affect student GPA is a binary logistic regression. Diploma students who receive “Bidik Misi” scholarships in Surabaya have high GPA value by 75%, while the other 25% have lower GPA. Factors that affect the GPA of diploma students who receive "Bidik Misi" scholarships in Surabaya, are gender, and long learning.

Keywords: Beasiswa Bidik Misi, GPA, Binary Logistic Regression.
