ABSTRACT

In the realization of Interstate Bridge Construction Project Multipurpose Terminal in Lamong Bay (Set C2) Surabaya, besides construction must fulfill the quality and cost targets, the realization have to apply Work Safety and Healthy in the field that refer to K3 Management System. The application refers to OHSAS 18001 cycle and PP RI No 50/2012.

Work Safety and Healthy system is law certainty and has law base that are must obedient by all parties, include the workers, supervisors, or other related parties.
In the final project of Interstate Bridge Construction Project Multipurpose Terminal in Lamong Bay (Set C2) Surabaya, which will be reviewed from the application of Work Safety and Healthy based on OHSAS 18001 and PP RI No 50/2012, can obtain the result that Work Safety and Healthy Management System which is made by the company has not done yet, this is caused by disobediance of workers to use personal protective equipment and the lack of safety facilities such as net in the diaphragm-plate floor that can cause the safety of workers is threatened and can damage the environment(disturbance of sea organism) due to material and workers who fell into the sea.
