# ABSTRACT

Nowadays the development of technology is very rapid once covering all areas of life including in the field of education. In this case does not directly lead to the young people like to learn more science-related technology than learn Aksara Jawa. To increase the interest young people in learning Aksara Java, no one is using the technology to create an application module teaching Aksara Jawa. In this research made an application to convert a word in Indonesian language to Aksara Jawa as module as a web-based teaching. In this application the user will enter the word in Indonesian Language and will then produce a Aksara Jawa from that word. This program is created using the PHP programming language and use database technology to store images of Aksara Jawa. Implementation of the database using MySQL.
