Abstract

For the preparation step into a college, a student generally following the tuition learning or do it himself at home. But to measure his ability all students generally have to wait tryout performed by party of school or institute the tuition. Needed a medium which can be used to assist student do self-supporting tryout.

For that, we try to make an application base on web which can enable student do self-supporting tryout by online, so that the student can do analysis to himself often because it can be accessed whenever and wherever. Beside that also enhanced information major. It helps students which generally confuse in determining such majors matching with his ability. This application enable student to do several times tryout. Tryout can be done individually and also group.
