ABSTRACT

At the time of this restaurant is not just a place to eat alone but as a lifestyle. A place for socializing, relaxing, enjoy entertainment, and even a business meeting place especially in big cities such as Surabaya. The existence of this support the growth of the restaurant with a variety of things offered as a superior product each. Complexity of urban communities cause differences in the needs and demands of high recreation facilities designed to encourage the presence of this object.

Function as a culinary center realized with the provision of a range of culinary (Indonesian, Asian, Mediterranean and West) in the effort as the fulfillment of the demands and needs of urban communities. This restaurant provides excellent facilities such as semi-outdoor and outdoor dining area that is entertaining. Objects in this area located in Existing Sea Master of dealing with the circumference of the Satellites is a district in the trade area West Surabaya.

On its shape, the building refers to the theme of landscape architecture and sub-themes with algae metaphorical approach. Algae is an organism with a position as a stage one producer, that functions as a source of life for organisms above where this is concerned with the function of a restaurant. In addition, also as an effort to bring green spaces to the city of Surabaya. Characters appear with algae metaphorical form of the organic, flexible, prompting the growth of algae, and symbiosis with the surrounding environment. So hopefully through this building is capable of being landmarks and interesting environment for visitors.
