Development of the comic world is very rapidly. Not only adults who read it but also kids love it very much. Because with pictures, intention of the author or information can be more easily absorbed by children. But with the development era, the comics which are presented mostly contain negative elements, and not suitable for children's reading.

Children comic appreciation centre is built to introduce comics that have education value to public mostly to children. This building can be used by comic lovers for discussions, hangout, etc. In addition there is a place to learn how to make comics for visitors.
