Title : Medical Rehabilitation Center of Surabaya
Theme : Spirit
Mentor : Ir. Erwin Sudarma, MT

Medical Rehabilitation Center is still rare in Indonesia, especially in Surabaya. Though many people who need medical rehabilitation to overcome the disturbance, disability, or any deficiency in himself to be able to move optimally. Therefore, a medical rehabilitation center is needed to meet the needs of the community will be able to restore health facilities functional capabilities and enhance the ability of his body are active.

Located in Surabaya, which is the capital of East Java, and strategic location because it is easily accessible for people from any area, besides that, the location adjacent to various hospitals in Surabaya, so that patients from a referral hospital can easily reach the location of this medical rehabilitation center.

Spirit of the design theme is expected to create an atmosphere of medical rehabilitation center which is different from the atmosphere in general hospitals, so that it can stimulate the patient psychologically for the always passionate (her spirit) and are optimistic about the situation better with medical rehabilitation. Highly influential psychological factor on the healing process. This design, in the design of access and space considering that the majority of the building users with physical disabilities.
