Special Therapy Center for Autistic Children is a place that became the center of treatment, healing and self development in children who are not able to form social relationships or normal communication. Therapy is the main thing that most autistic children need than academic. In this therapy center also provides services and information for parents of children with autism.

The theme used in this design is the interaction, this is motivated by the main problems of children with autism is difficult to interact and socialize with the surrounding environment and as if life with his own world. By looking at the behavior of autistic children who have different ways of giving a response on the environment theme in the approach to take is the Insight Architecture Behavior.

The concept will be shown in this design is to bring an atmosphere of social interaction can create physical and mental between individuals who are in the building and the interaction of environment, this is manifested in the exterior and interior of the building.
