Abstract

Body Care Recreation Center is a building that is expected to become the container of all activities of body treatments, beauty, and recreation for a while from all the fatigue and tension experienced by users. Basically, body care is an institution that people of the capital city like Surabaya need enough, which through the air pollution and crowded city atmosphere almost every day. This building embodies everything with all the recreation and relaxation facilities supported by a place that far from the capital city, the Taman Dayu recreation place.
