Abstract

Our lifes were upon the develop of Science knowledge, Technology, and Art. Like few visual-audio media which much influence the develope of education world for national generation. Specially for first age of education which is in elementary school.

These caused the impact for the studying motivation for Elementary School student unstable for few specific matery of study. Such as for Science matery which danger for half Indonesian student. In science’s education teacher stuffed to function nature by student as source of knowledge. Visual media can explain an incident / fact, situation, solving space and time limit also easy to introduce.

For that the introduction methode by presenting interactive cd hope could help Elementary School proceess study. This cd contains kids Science, simple explanation and easy to understand by fourth grade Elementary School, also the effective ways to start introduce kids to the computer and how to operate with push the button with mouse while learning.

Keyword: Sains, Education, Interactive, Fun and active learning.
