ABSTRACT

FINAL PROJECT REPORT OF RA. 091381

EVEN SEMESTER PERIOD 2010 – 2011

Student : Tiara Permata Sari
NRP : 3207 100 044
Title : Diagnostic and Therapeutic Center for Mental Disorder
Theme : Healing Environment
Mentor : Ir. Purwanita Setijanti, M.Sc, Ph.D

Diagnostic and Therapeutic Center for Mental Disorder is needed for large cities such as Surabaya, because people living in big cities more vulnerable to risk going mad. Social relations and the worsening economic problems, high workload, and the level of traffic congestion can be womanly some triggering madness (schizophrenia) or other psychotic disorders. Surabaya as the capital of East Java is a big city that allows the emergence of the problem. Located in Surabaya, which is the capital of East Java, and strategic location because it is easily accessible to patients (People With Mental Problems - Orang Dengan Masalah Kejiwaan - ODMK) from any area. In addition the location of the Diagnostic and Therapeutic Center for Mental Disorder is close to public hospitals so that patients who need referral care could easily reach the location of the nearest public hospital. Object design theme of the Healing Environment is expected to create an atmosphere of Diagnostic and Therapeutic Center for Mental Disorder different from the mental hospital-atmosphere in general, namely to create an atmosphere that is able to heal so that it can stimulate the patient which can later affect the healing process. The design considers the circulation of designing objects, spatial organization, color and shape of the building that are adjusted to the user of design object.

Keywords : Diagnostic and Therapeutic Center for Mental Disorder, Healing Environment
