Title : Surabaya Heart Hospital

Theme : Pulse

Lecturer : Ir. Erwin Sudarma, MT

There is no heart hospital in Surabaya. Though many people who need a building that can facilitate the diagnosis, treatment, and medical rehabilitation related to heart in one stop. therefore, a heart hospital is required to meet the needs of the community health facility that can do the handlers and maintenance quickly and efficiently.

Located in Surabaya, the capital of East Java, and strategic location because it is easily accessible for people of any area, in addition, the location adjacent to the hospital in Surabaya so that patients from referral hospitals can easily reach the location of this heart hospital.

The design theme of the pulse is expected about providing a different atmosphere to the hospital in general, so as to give encouragement to the patient psychologically to have to keep the spirit alive (pulsed) and is confident of better things with care and medical rehabilitation. Because psychological factors are very influential in the process of treatment and cure of patients with heart disease. This design in the design of access and consider the effectiveness and efficiency in relation to the "golden time" of heart disease.

Key words: heart hospital, pulse
