The mosque and complex framework Darul aitam Al Ichsan which indirectly become a Centre for the development of Islam in the kab.Mojokerto. But this religious complex still does not comply with the principles of architectural design in development. It is therefore necessary to modify the design so that it can be one of the new icon kab.Mojokerto which may reflect the cultural values and Islamic education and housing for orphan children/orphans. Redesign of the complex in addition to increase the vertical relationship between man and God, but is expected to increase in horizontal relations between man and man, through his role as DI container for the entire society.
