ABSTRACT

Walk up apartments for Industrial Workers of West Surabaya is a function of vertical occupancy for Industrial workers in West Surabaya. The location near to industrial park. This Walk up apartments for Industrial Workers is expected to meet the residential needs of shelter for industrial workers in the industrial area that is always growing every year. Especially for migrant workers from outside the city. Eliminate slums caused by the increasing number of rental homes that exceed the capacity. It will also streamline the land and as a citizen closer to the workplace.

Walk up apartments uses the theme "Oasis". The theme of this oasis in the second case is defined as the coolness of physical and spiritual. In the application to the design, object design and its clusters form, the mosque is located at the center like water in the desert oasis. Coolness interpreted from oasis that is identical to the cool air in the hot desert. Application forms on the cool design object consist of two things: physical and spiritual coolness. Coolness was applied to the formation of physical clusters which consist of several building blocks to the distance among the blocks. So that the wind can burst in from all directions into the building. In addition, there are gardens and shady trees on the building site. Spiritual coolness, applied to the placement of a place of worship a mosque in the middle of residential units.
