Abstract

Increasing number of tourists both local and foreign Indonesia occur from year to year. This is supported by data on the official website of the Ministry of Culture and Tourism of Indonesia. Although the number of tourism lovers increasing, the availability of special media for documentation there is not yet. For the tourism lovers, travel documentation is a very important thing. Usually they are documented individually or share on social networks that are not specific for tourism.

From the explanation above, it can be concluded that the existence of a special media for tour documentation is required. This media are able to provide a place for tourism lovers to keep all the memories tourist sights in one place. Not only that, this media can also be used as a place to share memories, stories, albums, and a place to interact among another tourism lovers. This media uses the concept of social networking to communicate between users. Users can follow other users, so knowing the latest travel activities of other users.

Testing of this social networking has been done in all the features to ensure users can use it comfortably. In addition, this social networking is also already have 10 people as users. It is expected that social networks can facilitate travel enthusiasts to document the tour, sharing stories, and add impetus to a growing number of visiting other tourist attractions.
