ABSTRAK

Human Resource training is one way to equip young generation of Indonesia to face the challenges of the times are getting harder and diverse. In the ITS campus itself forming the character to have a superior human resources sustainably run but are now starting to worry about the condition of a just culture that made senior to junior without knowing the real essence.

One of the factors that led to the deterioration of quality is not the standard that became the benchmark as the ideal role model for students and facilities were inadequate. (In fact, the existence of a clear mechanism and infrastructure plays an important role in the birth and nurture students).

Based on the foregoing, it will be discussed about training facilities for human resources training tool that uses reference the theme of "synergy". This theme is based on the premise that it is necessary to the process of unification of the various components to be something better. It should be understood that the education that education is something that needs to be implemented in a comprehensive review of the various aspects.

Expectations will be achieved from this study include the facilities for obtaining criteria human resource training building that can shape, enhance and maintain the quality of ITS student character.
