A shopping mall has become more than just a necessity, for the people of big cities such as Surabaya, shopping malls have become part of their lifestyle. Big city dwellers tend to want things that are practical, simply by visiting a single place, they've got a variety of their needs, ranging from the most basic needs, to the needs of recreational and refreshing. Therefore, now, shopping mall contains more than just the shops that lined the corridor, but the stores are arranged in such a way that it becomes very attractive, complete with a variety of attractions in it. Shopping malls today are almost never separated from the areas of entertainment and cinema.

The architecture has a very important role in the planning of a mall, because the architecture became one of the mainstays of a mall to attract visitors. Form and expression of the beautiful facade be of interest to prospective visitors or for passing road users, the atmosphere inside the mall can also be made attractive through architectural exploration. Exploration and interpretation of open green spaces are also considered as the main issue of a process of problem solving in design.

This shopping mall is planned to be built on Kedung Baruk, a corner land that extends from east to west, it is located in one corner of the intersection bridge Surabaya MERR. This mall is planned to be built as high as 4 floors, with tenant facilities of shops, cafes, etc., as well as public facilities like food court, bank, ATM center, play areas, and theaters. The main concept is offered in the planning of this mall is the concept of green open space.
