ABSTRACT

Culinary business is an everlasting business since as long as people live, they definitely need a food. In addition, by looking at the population of Indonesian citizen, this can be a great market opportunity for the culinary business. Nowadays, so many people are interested to explore and create culinary business in which need a skillful human resources in culinary.

Followed by the increasing of culinary business, the culinary academy arises as the media to create a professional chef. During their study in this academy, chefs are taught some techniques in processing food, cooking dishes and assorted pastries from all around the world. Not only processing food in a good way, but the chefs are also taught the culinary art and aesthetic while serving food.

Supported by good facilities and ambiences are hoped can inspire the students and makes them comfortable while studying there. The multicultural ambience which is inspired from the characteristic of food all around the world is realized on the element of the interior. While the modern element is characterized by a formation of straight, horizontal, square and few curve. Meanwhile, the element of classic (Europe) characterized by the ornament on its carving. The blend of the elements above is expected to create the atmosphere in the academy more alive. Moreover, it can also trigger the students becomes more competitive to get an achievement.
