ABSTRACT

The development of the business and the business grew rapidly followed by either individual businesses or institutions where Cafe and Resto as a business in a workspace and lifestyle. In the design of cafes and restaurants, we take an object cafes and restaurants located at the street SAS Baskara Sawah No.03 - Surabaya. In the building there are a few points that still a problem in the interior design.

From the observation Cafe and Resto, found several factors that can make a design that produced more optimal. The design is expected in the future could result in a cafe and a restaurant that has a fabric indoor or outdoor area that was designed with the modern concept of natural convenient, simple and luxurious. It also carried out a study of the literature to determine the condition of a building with a good cafes and restaurants.

The things of the underlying design of the cafes and restaurants that the discovery of some shortcomings and advantages as well as the discovery eksistingnya building materials supporting more innovative and economical. Natural modern style gives a life to design indoor and outdoor space.

In the final design has been discussed several design concept to support the design and Resto Caffe interior design with the concept of Modern Natural SAS. Among the concepts of color, style, material and shape. The design is expected to
make design objects have a more attractive appearance and in accordance with the design concept and can meet the existing facilities.
