ABSTRACT

Surabaya is a city that is growing, especially in terms of musical art. Currently growing in the field is the choir as we know ITS, Airlangga University, UWM, SMA 5, SMA St. Louis, SMA 6, etc. Universities and schools in over a year at least twice a concert to develop their qualities, presenting and introducing the music to the people of Surabaya. Many emerging private music schools such as Melodia, Yamaha Music Indonesia, Purwacaraka and Harmony. Almost all of them do not have a good practice room or their practice in small room.

It would require a means of Music Performance Hall Surabaya which is striving to meet the needs of the people of Surabaya in the art of music and cultural entertainment representative.

Music Performance Building gives the image of Surabaya interesting and attractive and easy to remember needs to be done. Thus, to support the design quality needs to be applied to a design theme that builds and made reference to the process of designing the object. Crescendo theme is closely linked with the art of music is a sign in sheet music musical notes to fill the dynamics of a tone, so that this object will be expected not only as a musical activity facilities, but also a landmark in Surabaya.

Keywords : building, crescendo, music, activities
