ABSTRACT

The period of pregnancy is the happiest moment as well thrilling. In addition, there are many mothers who ignore the need for preparedness before pregnancy. Though preparedness before pregnancy will affect the pregnancy and also the baby to be born. Given the physical condition of pregnant women and atmosphere are always changing all the time, it is necessary to do the proper exercise to support the health of mothers and their babies.

Maternity Care Centre in Surabaya are only found in the Maternity Hospital. So the function of maternity care centers becomes less than it should be because it only provide gyms for pregnant mothers. Therefore, in Surabaya, it is necessary to have maternity care centers that can provide facilities that meets the needs of pregnant women.

To support all of these requirements, health and fitness facilities required for pregnant women with an interior design that can give the impression of natural and modern. Natural atmosphere here can bring a comfortable atmosphere so it can be reassuring therein. While modern look gives the impression of a simple, practical and functional.
