**ABSTRACT**

Along with the many students MMT-ITS coming from outside the city and take in college education S2 MMT-ITS, in the long-term future. Campus MMT-ITS will be constrained by the increasing number of students who are taking classes in MMT-ITS, and will give rise to a number of events - events that would arise, such as: Seminars, and others., to the campus MMT-ITS requires a guesthouse as a representative and support facilities that are able to facilitate the needs of guests who follow events in MMT-ITS and the campus as a place of transit, relax, unwind, and others.

Design methods used include data collection is held directly or indirectly. Interviews and observations directly into the field to find out what is needed. While the literature study, literature books, and the internet media design to know interior design of guesthouse MMT-ITS. Is a way to get his supporting data, design standards, design and development of object references required. The data that have been obtained will be carried out by descriptive analysis.

The result of this is interior design, how to design a guesthouse MMT-ITS by applying the concept of Eco-Friendly with a modern theme as a means or place of residence suitable and convenient for students and the general public.
