End of the task object design "SURABAYA PUBLIC LIBRARY." Library is an indicator reading public interest and social maturity barometer of culture and society. In addition, the library also as a long-establish community resource. Library can also help rebuild the social life and economic vitality in the community with the good. This library takes place in the Menur Pumpungan street according to land use and sneak the settlement area.

The theme of this design object is FLEXIBLE. Use of the themes expected to be able to bring a library which is always dynamic, and also the development of the technology era. It also is able to accommodate the growing needs of libraries and community desire. Therefore, the library must be present to give space to grow, especially to the vertical direction and create spaces that are able to change the function room.

This library has a concept that combines the educational and commercial facilities that is still associated with the library activities so that it is able to provide interesting and new experiences for visitors. So that the library be a part of daily life community. Therefore, in addition to facilities and a complete collection but also the convenience and effectiveness that should be part of a public library that is able to keep serving the community well.
