Abstrak

Because competition in education institute, so ITS changing education orientation to result more competence graduate. While there is academic regulation 2009-2014, ITS change to Teaching Centered Learning (TCL) method as Student Centered Learning(SCL) method. So that information systems department ITS (SI|ITS ) adapt to standard operation of lectures program. A new development the standard operation of lectures program, it’s expected to support studying process today.

The adapt of standard operation of lectures program is started from older document to be analyzed and developed, in creation of standard procedure and reference form and application menu for every activities. The last phase, development and organize them as one book named standard operation of lectures program of Information System Department.

Those book contents is six procedure activities, sixteens reference forms, one letter, ten education monitoring application functions, the standard operation matrix, and business process of lectures program.

Keyword: the standard operation, Student Centered Learning (SCL), procedure
